Rear View of Rim Attachment

“Dunk Proof” Glass Backboard

The rim is attached to a metal plate which is connected to the main beam. No bolts pass through the glass – so dunking never places stress on the glass.

“I keep singing the praises of your goal to anyone that will listen. The fact that the rim never touches the glass is a no brainer for me, and should be for everyone else.”

T. Ross Bailey
Senior Associate Athletics Director
Texas Christian University

Spring-Activated Positioning Pin

automatically snaps into place when the goal is fully raised.

Lockable Deadlock Tensioner

creates a crosslink between the vertical support structures and helps reduce vibration.

Automatic Lock Down mechanism

now with foot operated release to make raising the goal easier.

New Triple Double Casters

in the rear and Double Swivel Casters in the front provide easier mobility and minimize stress on wood floors. All 10 wheels are 8” diameter.

Forklift Tubes

New Redesigned Power Beam maintains optimum stability and endures years of physical punishment.

Lifetime Maintenance-free Pivot Bearings.

Heavy-duty Vertical Support structures with streamlined profile provides fans with a clear view of the action.

Thicker Impact Area Padding

for greater safety. Vinyl covered padding available in 16 standard colors and a wide assortment of custom colors.

Quick-Set™ Goal Height feature permits easy rim height adjustment even while the goal is locked in the game position.

100% Enclosed Ballast is precisely placed to counterbalance direct force on the goal and provide optimum stability.

New “Power Pack.” Larger, more powerful lift springs provide greater torque.

Exclusive Pro-Action™ 180° Adjustable Tension Breakway Rim

A safer way to slam dunk, our exclusive multi-directional breakaway rim helps protect players.

180 breakaway rim features adjustment capabilities for passing the NCAA regulations for elasticity as well as the positive locking mechanism for the most consistent rebounds.

Real Service from Real People

We’re not satisfied with just building the best portable goals. When you have a question or a problem and you call our 800 number between 8:00 to 5:00 EST, you reach a person who will handle your issue or connect you to a specialist who can. Some websites have no phone number to call, and they try to force you to send an email that may - or may not - be answered hours or days later! Our website has the phone number at the top of the home page for your convenience. And of course incoming emails are handled promptly. Our aim is for total elimination of the frustration you face when contacting any company for service.
